Military Use of AI

- **AI is being used to process battlefield data, target individuals, and make real time decisions.**

- **AI is beginning to be used in autonomous weapons.**

- **Companies cannot be trusted to self-govern.**

- **Example: Google's Project Nimbus**

- **Somehow doesn't contradict Google's AI Principles**

Employment Impact

- **Will most employees become obsolete?**

- **Innovation has always done this but AI takes it to a new level.**

- **There will undoubtedly be massive job losses, but also many new opportunities.**

- **Knowing how to leverage AI will be one of those opportunities.**

- **Example: software engineers => systems engineers**

- **People will be need to operate at a higher level of abstraction**

"As an employee, you're not paid to '*know x*', or '*write programs*', you're paid to be useful." - Ian Miell
